INDEX OF ABSTRACTS
Volume 19 (1972)

AARTS, Johannes M. and LUTZER, David J. Completeness properties and Baire spaces. Preliminary report, A-805; Pseudocompleteness and the product of Baire spaces. Preliminary report, A-609.

ABDELAZIZ, Nazar H. Spectral properties of some positive operators in a Banach space with the decomposition property, A-646.

ABERTH, Oliver G. An iteration method for finding all zeros of a polynomial simultaneously, A-233.

ABIAN, Alexander. Set-theoretical canonical models, A-19; Set-theoretical models and Boolean rings, A-604; The identity theorem for analytic functions, A-696.

ABLOW, Clarence M. and AGGARWAL, H. R. Shape of a membrane tank, A-240.

ABLOWITZ, Mark. Semiresonant interactions and frequency dividers, A-665.

ABRAHAMSE, Allan F. Uniform integrability of derivatives on σ-lattices, A-635.

ABU-ZAHRA, Said. Bounds for the number of deficient values of entire functions, A-111.

ADAMS, Donald H. Baer semigroups as an equational class, A-350.

ADAMS, Michael E. The Frattini sublattice of a distributive lattice. Preliminary report, A-750.

ADELBERG, Arnold M. An algebraic formulation and proof of Bezout's theorem. Preliminary report, A-64.

ADELSON, L. E. Singular perturbations in a class of improperly posed problems, A-139.

ADOMIAN, George. Stochastic Green's functions, A-229.

ADRIANOPOLI, Fausto. See DeLUCA, Aldo.

AGARWAL, Arun Kumar. A note on the geometric means of entire functions of two complex variables, A-639.

AGGARWAL, H. R. See ABLOW, Clarence M.

AGRAWAL, Jagdish C. See MANICKAM, S.

---, See RAY, M.

AHERN, Patrick. On R. P. measures on the torus, A-398.

AHLERS, C. W., LEWIS, Truman O. and ODELL, Patrick L. Best linear estimation when the data belongs to a multivariate stationary process. Preliminary report, A-231.

AHLSWEDE, Rudolf. Solution of Shannon's zero-error capacity problem for polygons. Preliminary report, A-249.

AHNER, John F. and KLEINMAN, Ralph E. The exterior Neumann problem for the Helmholtz equation, A-368.

AITCHISON, Peter W. Two finiteness theorems in the Minkowski theory of reduction, A-814.

ALAGIA, Humberto R. Conjugate classes of Cartan subalgebras of real simple L*-algebras, A-81.

ALAS, Ofelia T. Properties of two cardinal topological invariants, A-23; Closed continuous images of some paracompact spaces, A-544; Expandability and σ-compact sets, A-723.

ALEX, Leo J. Some exponential Diophantine equations which arise in finite groups, A-294; Simple groups of order $2^a3^b5^c7^d p$, A-566.

ALEXANDER, Stephanie B. and BISHOP, Richard L. Convex functions on spheres. Preliminary report, A-402.

ALEXANDERSON, Gerald L. and WETZEL, John E. Dissections of a simplex, A-596.

ALI, Ziad S. Convexity of Nörlund and progressive means, A-695.

ALLAUD, Guy and THOMAS, Edward S., Jr. Almost periodic minimal sets. Preliminary report, A-725.

ALLAWAY, William R. On finding the distribution function for an orthogonal polynomial set, A-729.

ALLEN, Graham D. On embedding set functions into covariance functions, A-224.

ALLEN, J. Thomas. Automorphism groups of algebras and relational systems. Preliminary report, A-292.

ALLEN, Keith R. Dendritic compactification. Preliminary report, A-341.

ALLENBY, R. B. J. T. and GREGORAC, Robert J. Generalized free products of locally extended residually finite groups, A-94; The free product of π_c groups amalgamated along retracts is π_c, A-291.

ALLINGER, Glenn D. Approximate global solution to the initial value problem, A-236.

ALO, Richard A. See de KORVIN, Andre.

ALO, Richard A., CHENEY, Charles Alex and de KORVIN, Andre. Abstract martingales. I, A-701.

ALO, Richard A., de KORVIN, Andre and KUNES, Laurence E. A topology associated with $\mathcal{L}^p$ spaces. II, A-320; Linear operators on $\mathcal{L}^p_E$. I. A-445; The c.a. ρ' property in L_ρ spaces. I, A-701; Some compactness properties in L_ρ spaces. II. Preliminary report, A-759.

ALTER, Ronald. The Diophantine equation $3^n - 11 = x^2$, A-297.

ALTER, Ronald and KUBOTA, K. K. Prime and prime power divisibility of Catalan numbers, A-48.

ALTMAN, Mieczyslaw. The contractor method for solving equations in Banach spaces, A-183; Generalized factorization theorems in Banach algebras. Preliminary report, A-300.

ALTON, Donald Alvin. Diversity of speed-ups and embeddability, A-711; Operator embeddability in computational complexity, A-763.

ALTON, Donald Alvin and MADISON, Eugene W. Computability of Boolean algebras and their extensions, A-249.

ALTSHULER, Amos. Vertex figures of cyclic polytopes, A-192.

AMANN, Herbert. Multiple solutions for nonlinear elliptic boundary value problems, A-138.

AMBERG, Bernhard. Groups which are the product of two abelian subgroups. Preliminary report, A-570.

AMELIN, Charles F. Generalized numerical range. Preliminary report, A-184; Generalized numerical range. II. Preliminary report, A-474.

ANANTHARAMAN, R. On the range of a vector-valued measure. Preliminary report, A-702.

ANDERSON, Clifford H. Functional and transformational differential equations, A-129.

ANDERSON, Donald A., McDONALD, Lyman L. and WEAVER, Kim D. Tests on categorical data from the union-intersection principle, A-230.

ANDERSON, Donald W. Homotopy chain functors, A-482.

ANDERSON, Douglas R. The Whitehead torsion of a fiber homotopy equivalence, A-467.

ANDERSON, William N., Jr., DUFFIN, Richard J. and TRAPP, George E., Jr. Matrix operations induced by network connections, A-67.

ANDERSON, William N., Jr. and MORLEY, Thomas D. Eigenvalues of the Laplacian of a graph, A-5.

ANDLER, Daniel M. Models of uncountable theories categorical in power, A-766.

ANDREWS, George E. A general theory of identities of the Rogers-Ramanujan type, A-624.

ANDRIA, George D., BYRNE, George D. and HALL, C. A. Modified Galerkin solutions of boundary value problems. Preliminary report, A-710.

ANNULIS, John T. A characterization of extended spaces. Preliminary report, A-159.

ANSELONE, Philip M. and JAMES, Ralph L. Uniform convergence of positive sequences. Preliminary report, A-165; Convergence of positive sequences. Preliminary report, A-477.

APPLING, William D. L. Distribution functions and set function summability, A-304; A Fubini-type theorem for finitely additive measure spaces, A-442; A representation theorem, A-515; Two convergence theorems, A-578; Set function measurability, A-690; Quasi-mutual singularity and digital representations, A-754.
ARAD, C. and GLAUBERMAN, George. A characteristic subgroup of a group of odd order, A-681.
ARBIB, M. A. and MANES, E. G. Machines in a category. Preliminary report, A-389.
ARKIN, Joseph. An Eulerian magic cube of order ten, A-728.
ARKIN, Joseph and HOGGATT, Verner E., Jr. The Arkin-Hoggatt game and the solution of a classical problem, A-619.
ARON, Richard M. Holomorphic germs in Banach spaces, A-162.

MEETINGS OF THE AMS
Abstracts Presented to the Society, A-25, A-347, A-469, A-548, A-614, A-727, A-771
Calendar of Meetings, Inside front covers
Preliminary Announcements
March: New York, New York, 63
St. Louis, Missouri, 64
April: Berkeley, California, 66, 114
June: Seattle, Washington, 163
August: Hanover, New Hampshire, 164, 191
October: Providence, Rhode Island, 200, 237
November: La Jolla, California, 238, 261
Chapel Hill, North Carolina, 238, 262
Cleveland, Ohio, 239, 263
December: Washington, D.C., 240, 264
January: Dallas, Texas, 264, 342
Programs of Meetings
January: Las Vegas, Nevada, 2
March: New York, New York, 90
St. Louis, Missouri, 101
April: Berkeley, California, 158
June: Seattle, Washington, 188
August: Hanover, New Hampshire, 212
October: Providence, Rhode Island, 258
November: La Jolla, California, 326
Chapel Hill, North Carolina, 329
Cleveland, Ohio, 337
December: Washington, D.C., 341

MEMORANDA TO MEMBERS, 154, 172, 201, 241, 314
Changes in Abstracts, 201
Combined Membership List, 1972-1973 - Change of Address or Position, 155, 172
Committee on Women in Mathematics, 154
Contributing Members, 241
Corporate Members and Institutional Associates, 154
Informal Sessions at Summer and Annual Meetings, 201
Mathematical Sciences Employment Register, Open Register, 349
New Mailing Labels, 155
Sociedade Brasileira de Matemática, 314
To the Members of the American Mathematical Society, 242

NEW AMS PUBLICATIONS, 83, 156, 183, 252, 276

NEWS ITEMS AND ANNOUNCEMENTS, 73, 79, 113, 115, 125, 127, 162, 165, 166, 172, 181, 184, 201, 206, 209, 210, 236, 240, 246, 251, 254, 256, 260, 279, 308, 317, 324, 350, 352, 354

PERSONAL ITEMS, 84, 145, 185, 208, 255, 323, 357

QUERIES, 314, 350

RESERVATION FORMS, A-288, A-562, A-748

SALARY SURVEY, 309

SEMINARS AND INSTITUTES
1972 Summer Seminar on Applied Mathematics, 67
1972 Summer Institute on Harmonic Analysis on Homogeneous Spaces, 68
Session of Contributed Papers in Biomathematics, 240, 264, 341

SITUATIONS WANTED, A-423, A-482, A-555, A-665, A-734, A-824

SPECIAL MEETINGS INFORMATION CENTER, 75, 133, 173, 204; 244, 315, 351

SUMMER GRADUATE COURSES, 141, 182

TAX STATUS OF GRANTS, 437

VISITING MATHEMATICIANS, 248
Supplementary List, 81, 143, 318, 358
